Questify Mobile Testing Checklist

Device / Browser info (fill this first)

- Phone model: _____
- Browser: _____ (Chrome / Safari / etc.)
- Screen width approx: _____
- Testing mode: ☐ Live Demo (GitHub Pages) ☐ Local server

---

1. General Mobile Layout & Responsiveness

- No horizontal (sideways) scrolling on any page
- Text is readable without zooming
- Buttons and tappable areas feel large enough (not too small)
- Content doesn't get cut off at the edges
- Images / icons load correctly and don't look stretched
- Spacing looks consistent (not too cramped or too empty)

---

2. Header & Navigation

- Logo is visible and clear
- Hamburger menu (☰) opens and closes properly
- Menu links work (Home, Quest Board, Profile, About, Sign In/Out)
- Notification bell is visible and tappable
- Header stays usable when scrolling (doesn't overlap content badly)

---

3. Authentication (Sign In / Create Account)

Sign In page

- Form is easy to fill (keyboard doesn't cover inputs)
- Email and password fields work
- "Show" password button works
- Validation messages appear when fields are empty or wrong
- Demo account works (alex@gmail.com / 12345678)

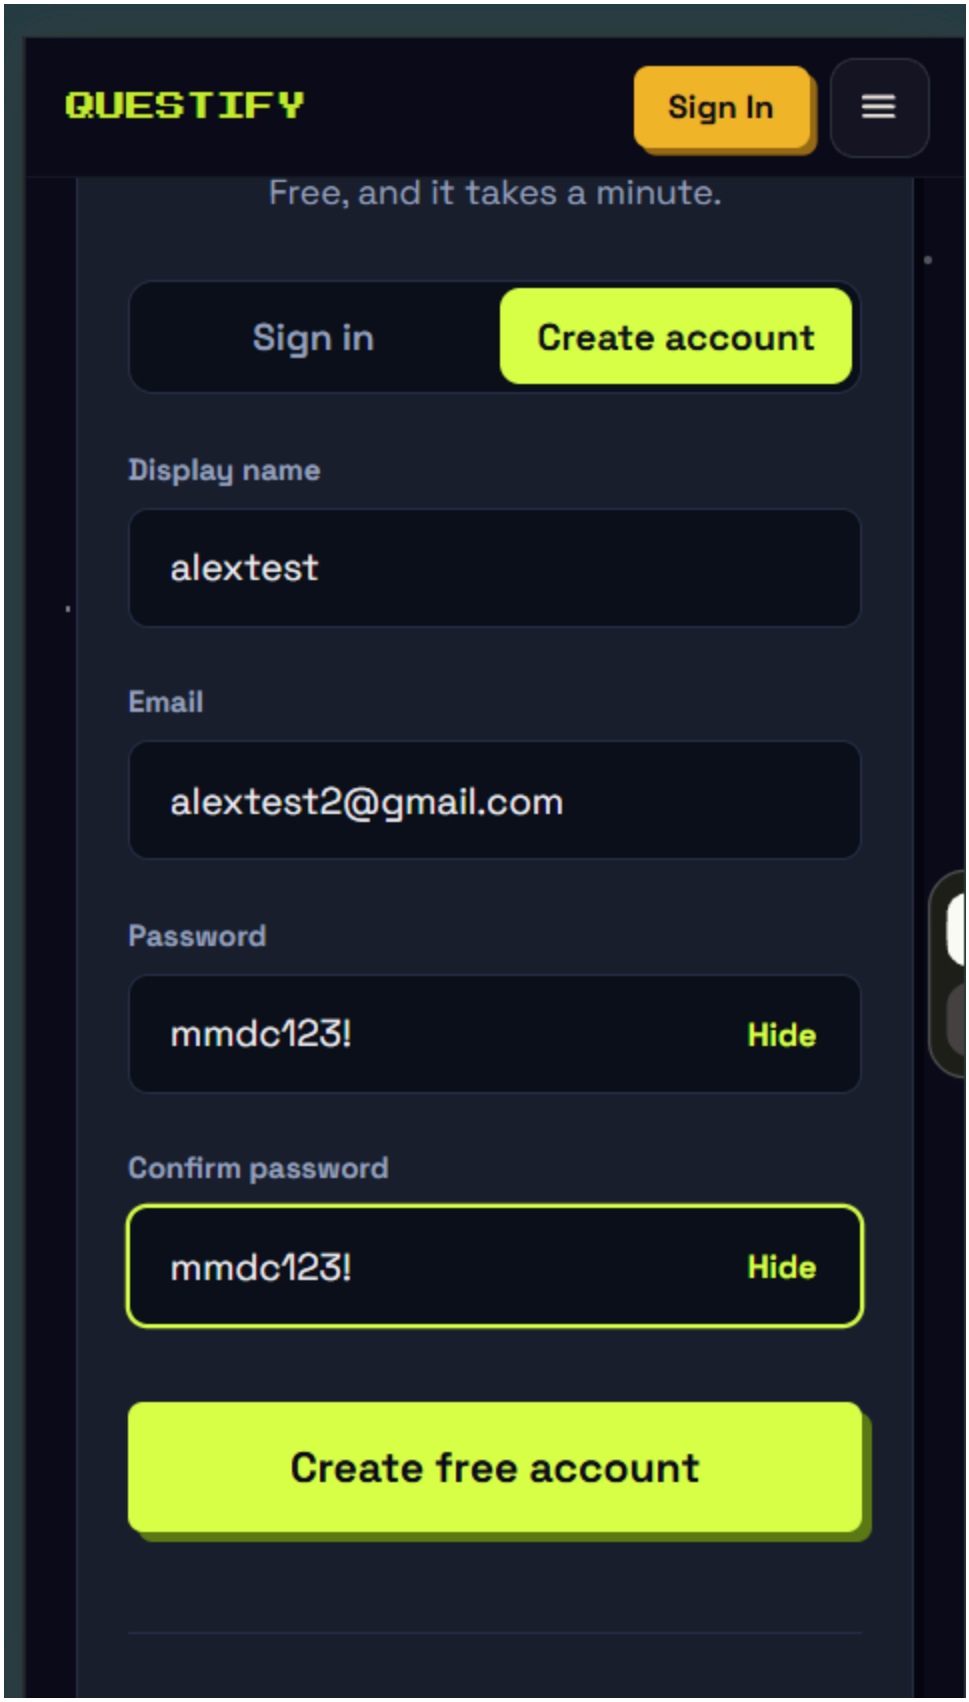

- Successful sign-in redirects correctly

Create Account

- All fields are usable
- Validation works (password length, email format, etc.)
- Account is created successfully
- New account starts at Level 1 with empty board

Sign Out

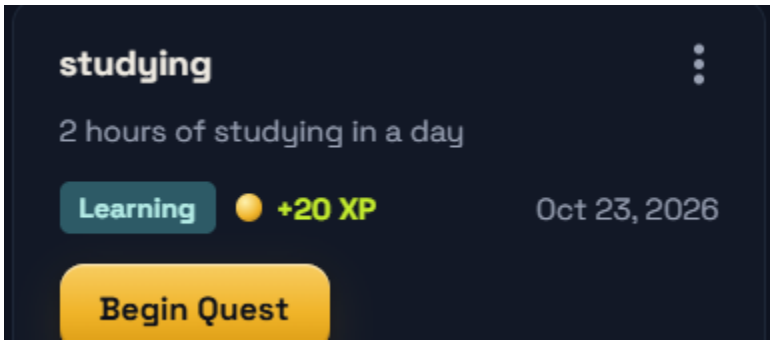

- Sign out works and returns you to a signed-out state

4. Quest Board (Main Feature)

- Player card shows correctly (name, avatar, level, rank, XP bar, streak)
- Stats row (Overdue / Due today / Done this week) is readable
- Search bar works
- Category filters work (All / Work / Learning / Health)
- Sort options work
- Tabs work: **To do / Doing / Done**
- Quest cards are readable (title, category, XP, due date)
- Overdue badges are clearly visible
- Floating “+ Add quest” button is easy to reach and tap

Quest actions

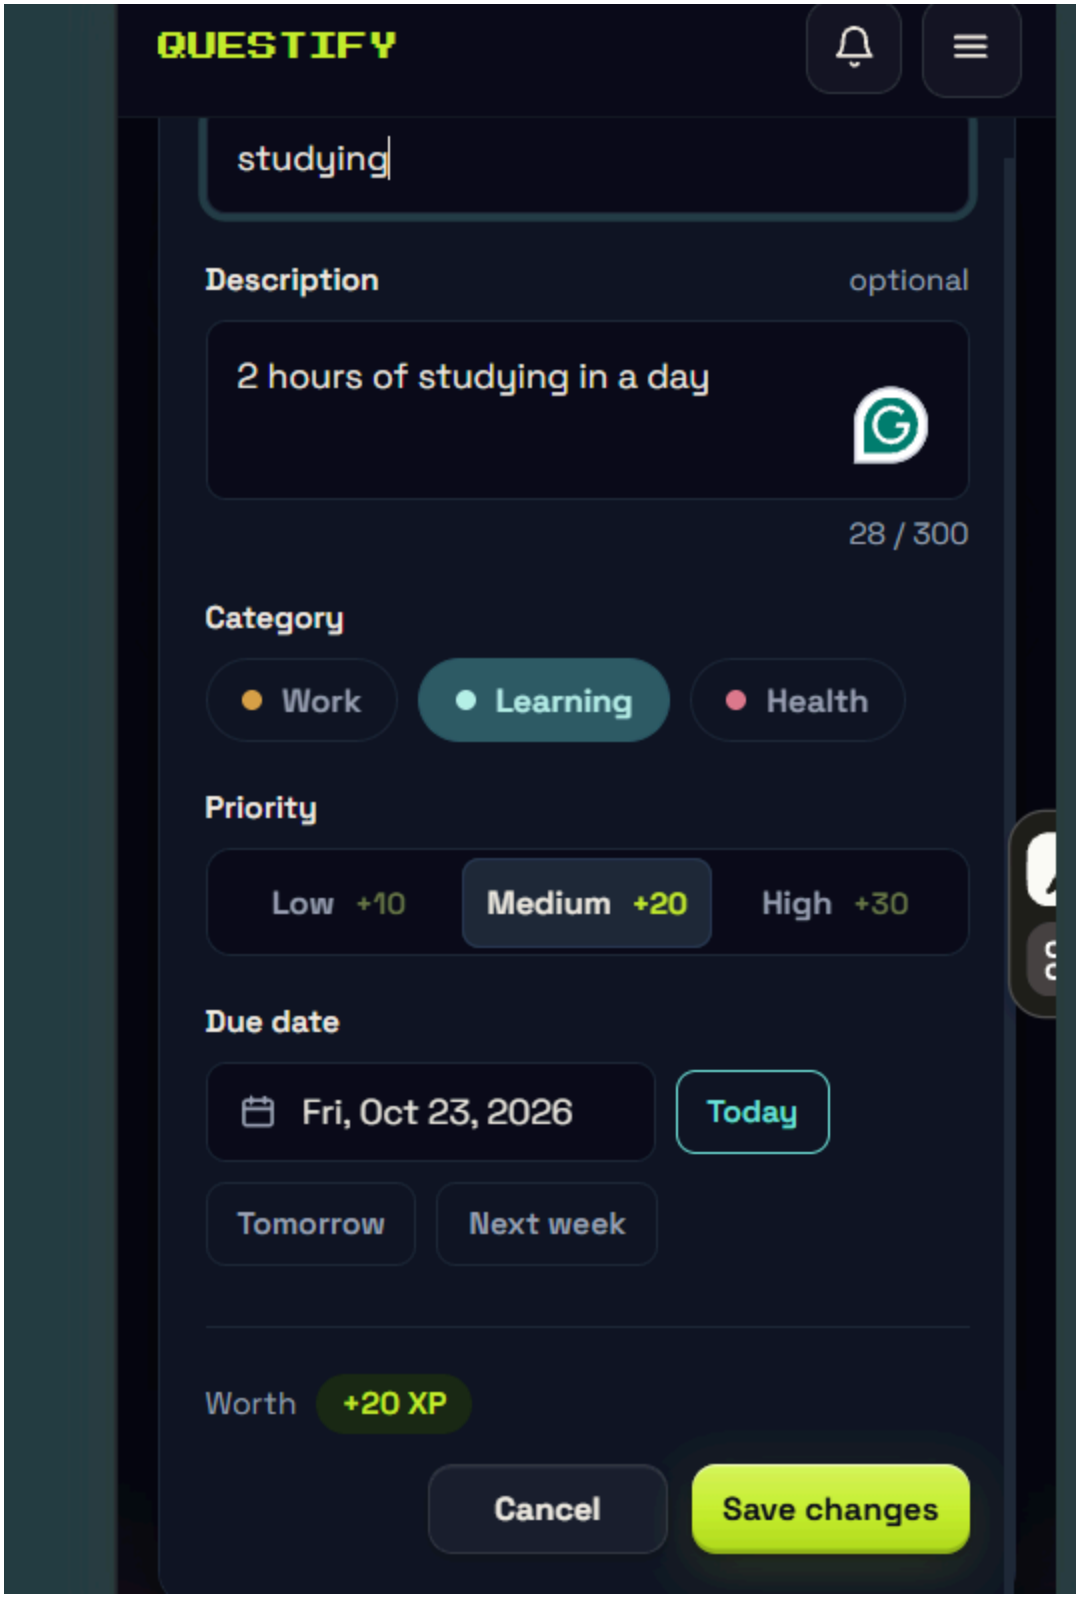

- Can open a quest card / menu (···)
- Can move quests between To do → Doing → Done
- Can edit a quest
- Can delete a quest
- Touch drag-and-drop / reorder works (if supported)
- Completing a quest gives XP and updates the progress bar

---

5. Add / Edit Quest Form

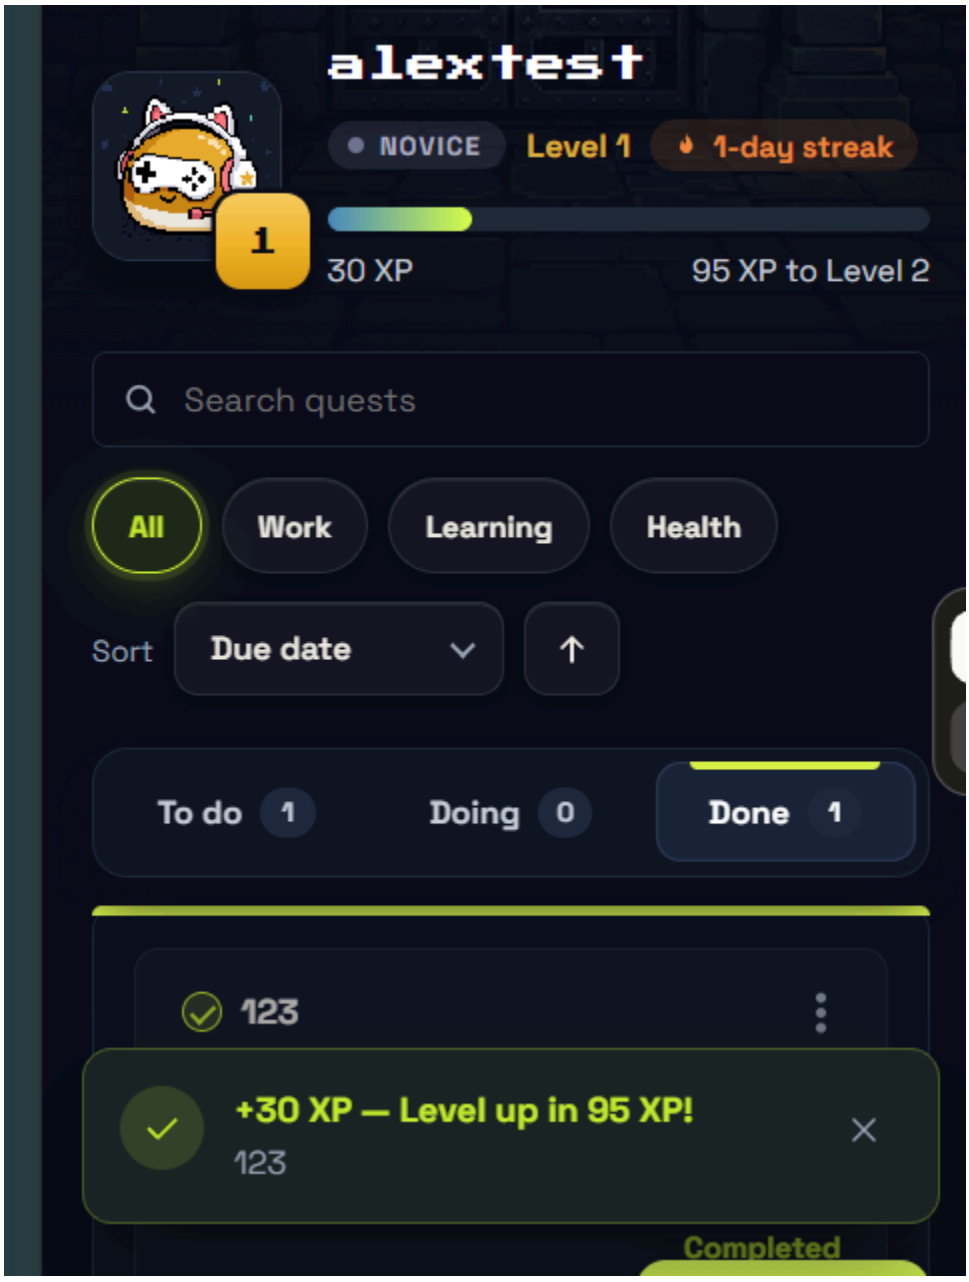

- Form opens cleanly on mobile
- All fields are usable (title, category, priority, due date, etc.)
- Keyboard doesn't hide important buttons
- Can save a new quest successfully
- Can cancel without saving
- Validation messages appear when needed

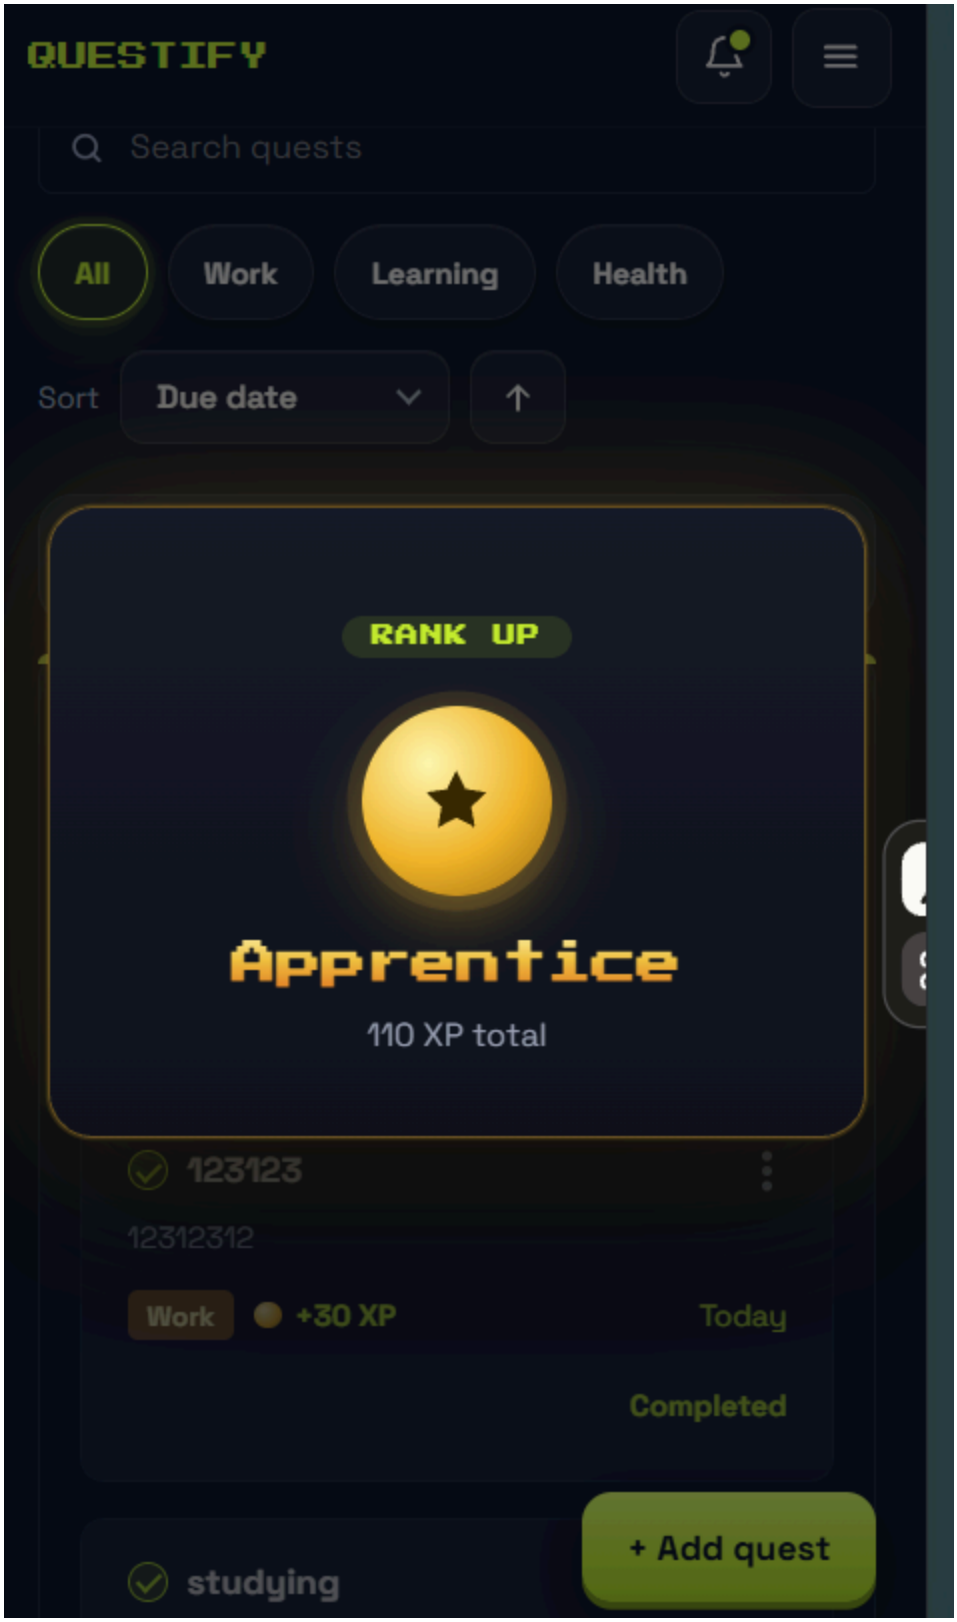

Add, edit, undone

6. XP, Leveling & Ranks

- Completing a quest adds the correct XP
- XP progress bar updates immediately
- Level-up happens when enough XP is reached
- Rank updates correctly (Novice → Apprentice → etc.)
- Notifications appear for level-up / rank-up (if any)

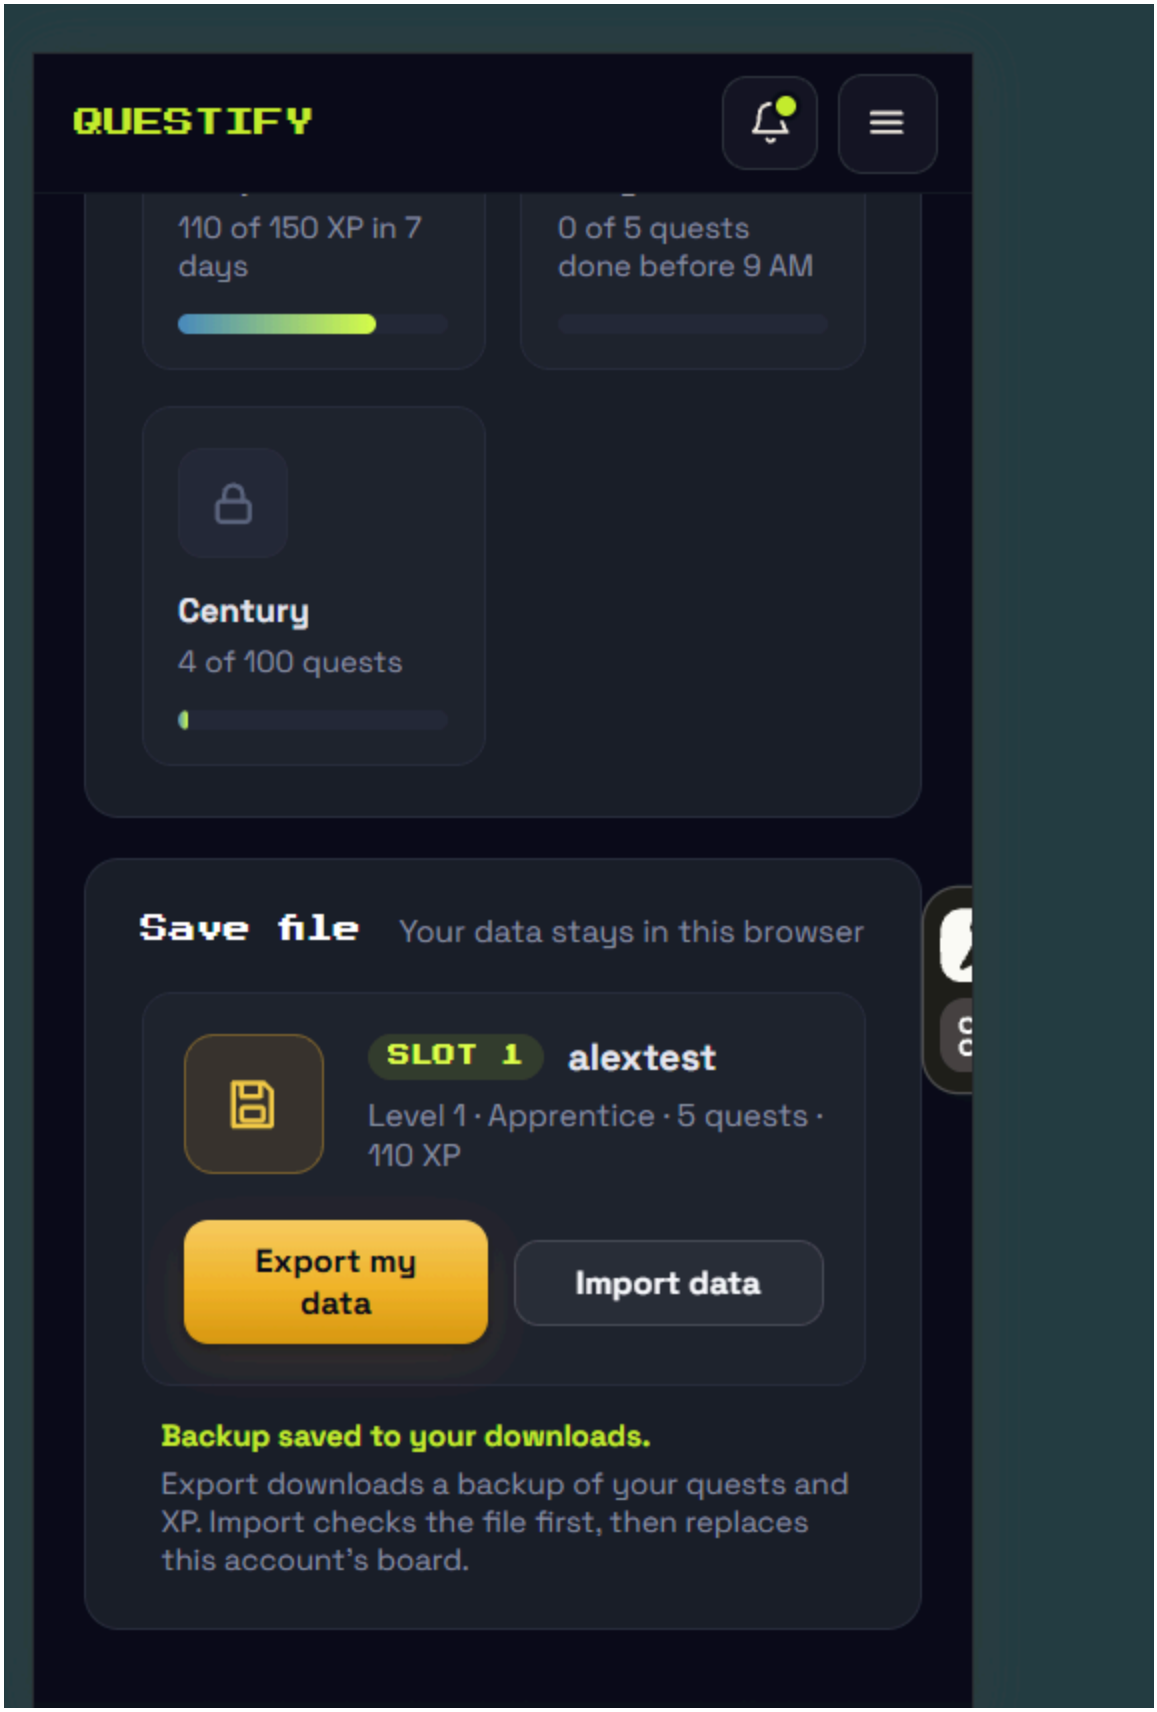

Rank up tried different vbariation of learning,work, and health

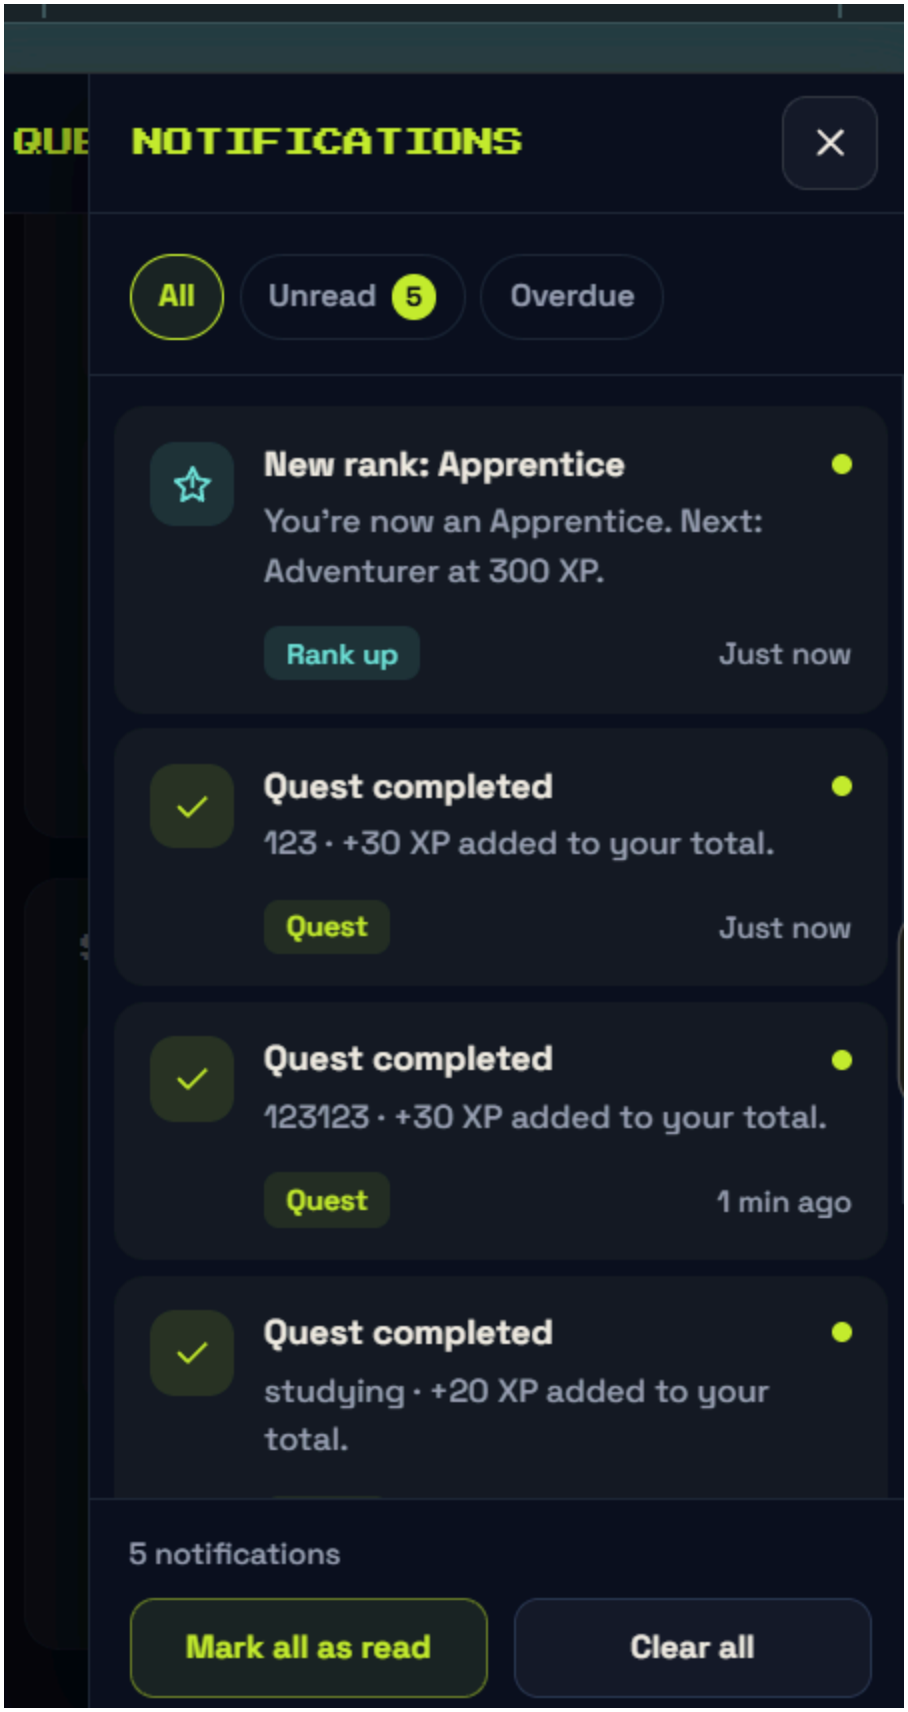

7. Profile Page

- Player info and stats load correctly
- Category breakdown / grid is readable
- XP chart / history looks fine on small screen
- Ranks and trophy shelf display properly
- Export / Import backup works (if available)
- No cut-off text or overlapping elements

QUESTIFY
110 of 150 XP in 7 days

SLOT 1
alextest
Level 1 · Apprentice · 5 quests · 110 XP
Export my data
Import data
Backup saved to your downloads.
Export downloads a backup of your quests and XP. Import checks the file first, then replaces this account's board.

8. Notifications

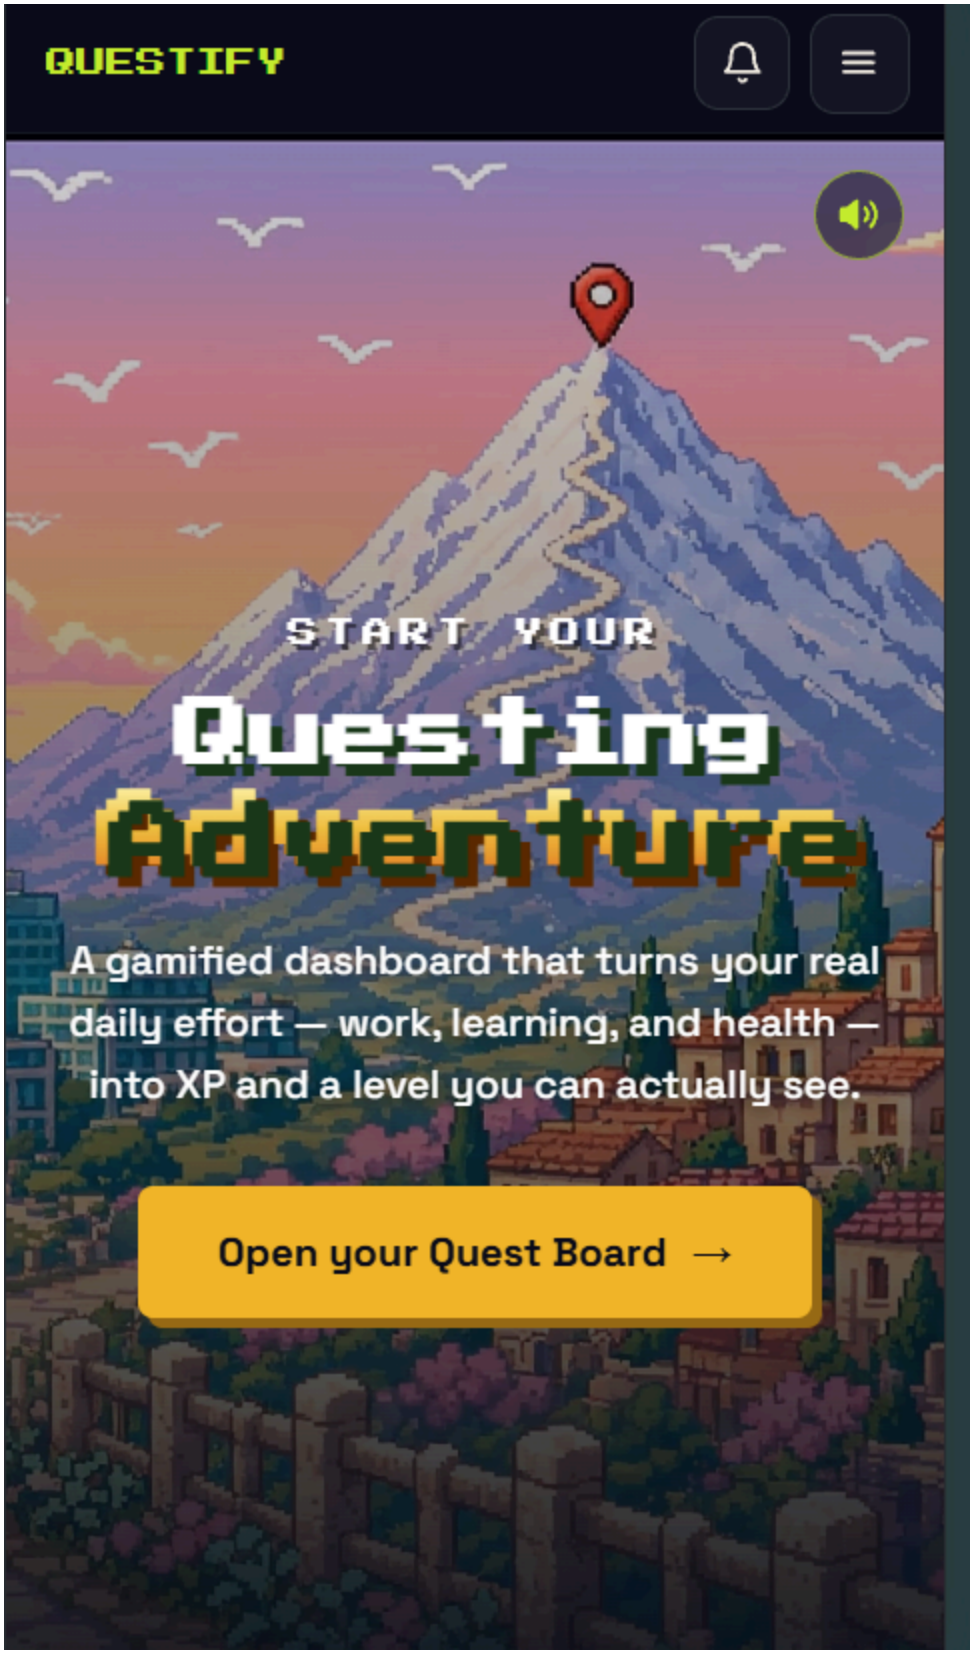

- Bell icon shows indicator when there are notifications
- Notification panel opens and closes smoothly
- Notifications are readable (Quest done, Level up, Overdue, etc.)
- Can dismiss or clear notifications

---

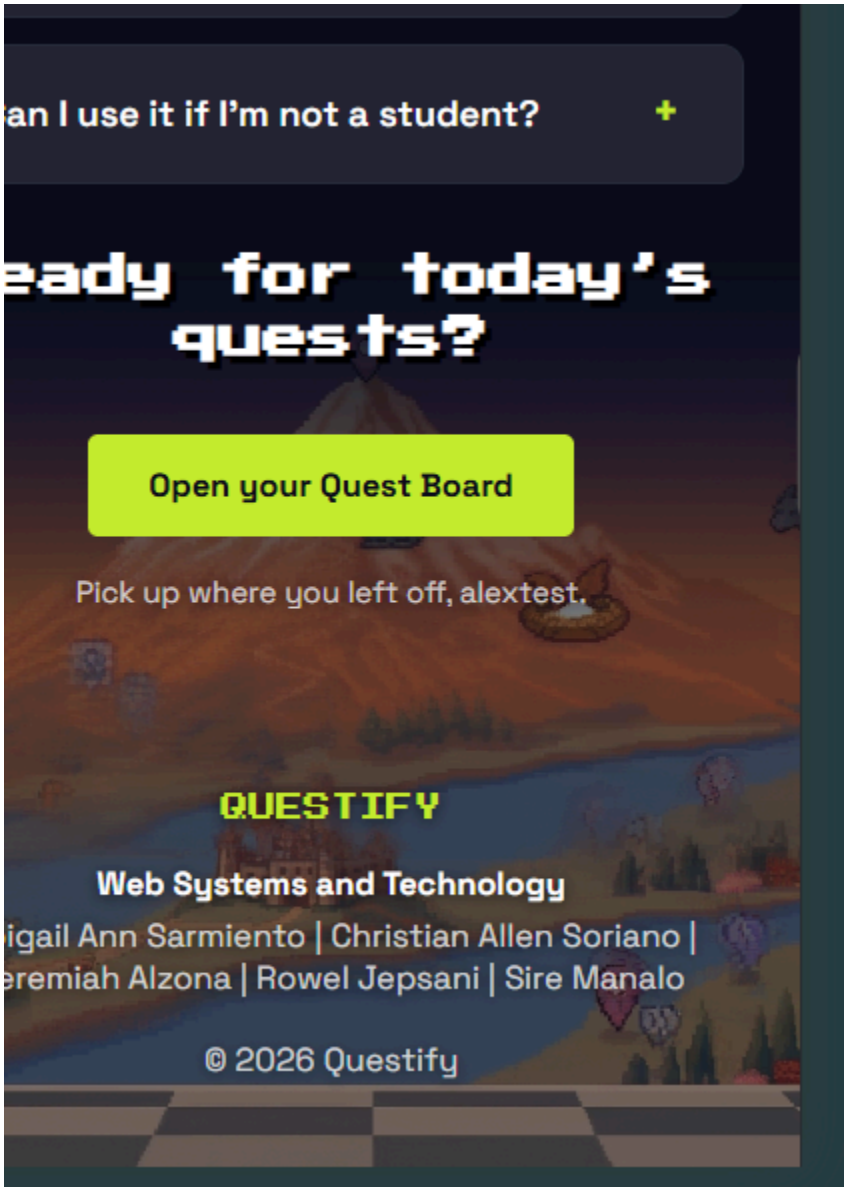

9. Home Page

- Hero section looks good
- Buttons (“Start your journey”, etc.) are easy to tap
- Sections scroll smoothly
- Feedback form is usable
- Team section / FAQ is readable
- Background music / mute button works (if present)

Adventure
A gamified dashboard that turns your real daily effort — work, learning, and health — into XP and a level you can actually see.
Open your Quest Board →

10. About Page

- Content is readable
- Team cards display properly
- No layout issues or cut-off text

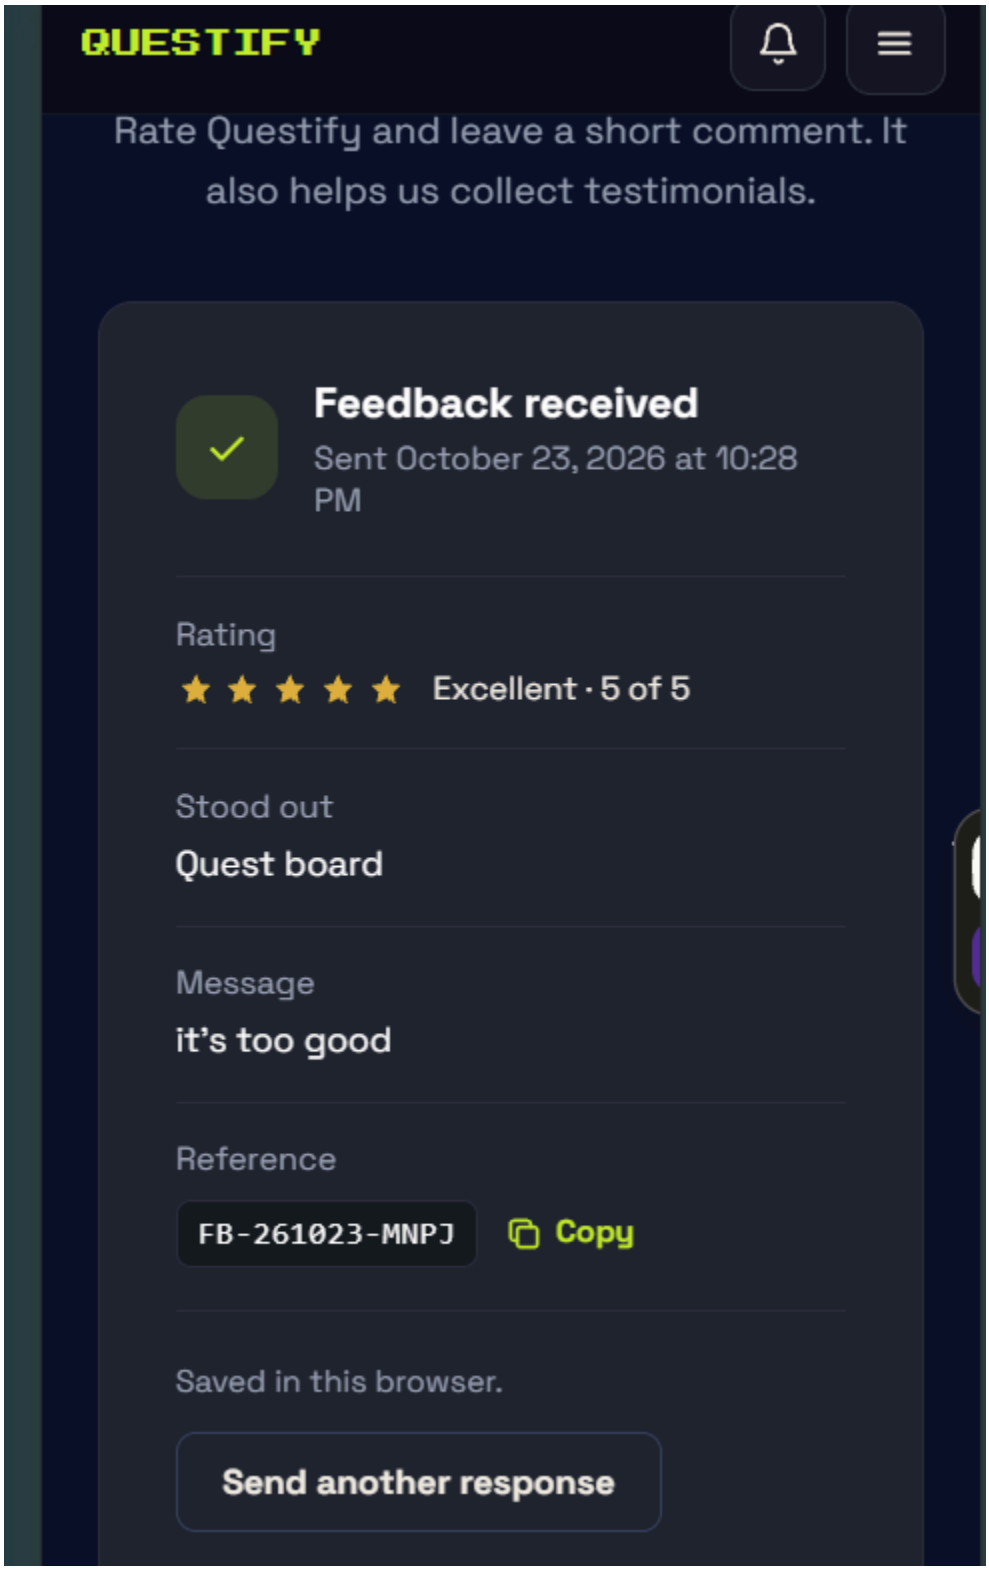

---

11. Feedback Form

- Rating stars / options are tappable
- Text area is usable
- Submit works and shows confirmation / reference number

- Error handling works if submission fails

12. Edge Cases & Extra Checks

- Rotate phone (portrait ↔ landscape) — layout still usable
- Works offline or shows clear message when offline (server mode)
- Long quest titles don't break the layout
- Many quests still scroll and perform okay
- Back button / browser navigation behaves correctly
- Accessibility: can you use it reasonably with larger text size?
